# CATCH

## Game Show Format

**Catch the answer... Catch your opponent... Catch the money!**

Get ready for a game show like never seen before! Catch sees a new kind of trivia gameplay with head to head battles where you don't say the answers... you literally catch them!

Winner of the 2012 FORMAGINATION format competition, Catch revolves around a huge innovative 'touch-screen' LED floor that reacts to the contestants' steps, allowing for some unique gameplay.

### **The Game**

At the start of every episode the host introduces 5 contestants who are all eager to win. The contestants are spread evenly around the show's big square game track.

### **Round 1**

In round one the contestants are one by one given a word-search question and must catch the answer as quickly as possible. The fastest contestant catches the answer, jumps forward on the game board towards their opponent and instantly eliminates him from the game! But beware: an incorrect answer means stepping back a square, increasing the chance of being caught!

### **Semi-Finals**

The remaining 2 players go head-to-head on a never seen before 'step screen' LED game board. Now it's all about collecting money! The players must literally jump on the letters to catch the answer, and then jump on the Money Square to claim the money. The first one to win 3 rounds moves to the thrilling final round.

### **Finals**

The contestant now faces an even bigger letter grid that contains many answers to a one-question theme – such as European Capitals or International leaders. For the first time on TV, the winner can try and double the money he won in the previous round with EVERY answer he finds within 60 seconds. But beware, decide to continue and miss the answer - it's GAME OVER and you are left with nothing!

***Catch: the catchiest game show on television!***
